# Darla Poling

## SUMMARY

**Data analyst** with 3+ years of experience analyzing, cleaning, and visualizing data using SQL, Python, and Power BI. Earned a B.S. in **Statistics with a** minor in **Mathematics** and an A.A.S. in Computer Science. Experienced in quality assurance methods, programming, and communicating cross-functionally.

## WORK EXPERIENCE

Business Analyst Internship — Speridian Technologies Jun 2026 – Sep 2026

- Supported a retrospective analysis of a NM PRC initiative impacting over 30 employees and stakeholders.
- Gathered stakeholder requirements and translated them into functional and technical specifications; developed supporting documentation.
- Conducted as-is/to-be process modeling, risk/benefit analysis, and stakeholder analysis to identify root causes and recommend solutions; used SQL and Python for underlying dataset exploration.
- Performed data modeling, data analysis, user acceptance testing, and visualization with Power BI to support project and change management decisions.

QA and Supply Chain Analyst — Roses Southwest Papers Feb 2025 – Apr 2026

- Reduced a key defect category by 5% through root-cause analysis and targeted process changes.
- Applied quality assurance and quality control techniques to identify process gaps and validate data quality in databases and accuracy across production systems.
- Produced 4 daily production reports using SQL, Excel, and Power BI, to clean, analyze, and visualize the data, translating operational data into actionable recommendations for leadership and acting as a liaison between technical and non-technical teams.

Inventory Control Associate— Scholastic Aug 2024 – Feb 2025

- Maintained inventory accuracy through stock tracking, inventory control, and discrepancy identification.
- Documented productivity metrics to support performance tracking and operational reporting.

Stockroom Manager/Inventory Analyst— Dd's Discounts Mar 2024 – Aug 2024

- Responsible for loss control, inventory control, and safety and health standards within the stockroom.
- Coordinated staff scheduling, contributing to a 10% reduction in stocking time. Maintained accurate operational records, documentation, and shipment tracking data.

## EDUCATION

University of New Mexico — B.S., Statistics; Minor in Mathematics

Relevant Coursework: Biostatistics, Advanced Data Analysis I, Advanced Data Analysis II, Int. Programming

Central New Mexico Community College — A.A.S., Computer Science

Central New Mexico Community College — Certificate, Health, Wellness & Public Safety

Google Analytics Certification, Skillshop

AI Fluency: Framework & Foundations, Anthropic

## TECHNICAL SKILLS

Programming & Query: Python (pandas), R, SQL (PostgreSQL), MATLAB, Java

Statistical Methods: Regression analysis, hypothesis testing, statistical reporting

Tools & Platforms: Excel (advanced), LaTeX, Git/GitHub, Microsoft Azure, AWS, Google Analytics, Microsoft Office

Visualization: Flourish, Figma, Power BI, R

Other: Root-cause analysis, data cleaning and validation, quality assurance, cross-functional communication

## PROJECTS

- Machine Learning Classification | https://github.com/darlapoling/Machine-Learning-Classification

  I used Python to build a machine-learning model to classify and analyze the Breast Cancer Wisconsin Diagnostic Database within Scikit-learn. The model predicts cancer diagnoses for this dataset within 94% accuracy.

- Health Data, Non-Response Bias, & Imputation Methods | https://github.com/darlapoling/STAT472_Hw6

  This is a project I completed for my Sampling Theory & Practice class. In this project I developed my skills cleaning, understanding, and analyzing health statistics through the NHANES (National Health and Nutrition Examination Survey) dataset. Finding the best imputation method for missing values, practicing mean imputation, and coding efficient loops for repeatable tests.

## VOLUNTEER EXPERIENCE

- ABQ DSA Treasury (2024): Processed and reconciled payments; followed up by phone to resolve payment issues; handled confidential financial data in accordance with privacy rules.
- ABQ BioPark (2019–2023): Volunteered with the organization for four years.
- Local organizations (2023–2026): Has held operational roles with local charity organizations for three years.
- Peer tutor in college: Provided technical support and troubleshooting, as well as training on specific tools and techniques.
