

DARLA POLING

Albuquerque, NM | [linkedin.com/in/darla-poling/](https://www.linkedin.com/in/darla-poling/)

PROFESSIONAL SUMMARY

Data-driven analyst with a Bachelor's in Statistics and hands-on experience in statistical analysis, root cause analysis, and process/yield improvement. Skilled in SQL, Python, and R for data profiling, hypothesis testing, and translating large, complex datasets into actionable recommendations. Strong communicator experienced in bridging technical and non-technical stakeholders across manufacturing and cross-functional teams.

WORK EXPERIENCE

Business Analyst | Speridian Technologies

Jun. 2025 – Present

- Gather and document business requirements through stakeholder interviews, translating them into functional and non-functional specifications for development teams.
- Develop process flows, user stories, and acceptance criteria; validate solutions through UAT.
- Leverage SQL and data visualization tools to analyze performance trends and support reporting across cross-functional teams.

Quality Control Inspector | Roses Southwest Papers

Feb. 2025 – Mar. 2026

- Profiled and analyzed production datasets daily for completeness, accuracy, and anomalies, using Excel and Accellos to model efficiency and quality metrics.
- Conducted root cause analysis on defect patterns and drove corrective actions, reducing a targeted defect type by approximately 5%.
- Gained working exposure to product design and process specifications on the factory floor, using this knowledge to distinguish design-related defects from process-related defects during analysis.
- Translated technical operational data into clear insights for leadership, bridging operators, mechanics, and management to support data-driven decision-making.

Stockroom Manager | Dd's Discounts

Mar. 2024 – Aug. 2024

- Managed inventory operations and staff scheduling; reduced stocking time by 10% through process optimization.

EDUCATION

University of New Mexico — B.S. Statistics, Minor in Mathematics

Relevant coursework: Statistical inference, regression analysis, probability theory, machine learning fundamentals, experimental design

Central New Mexico Community College — A.S. Computer Science; A.A. Liberal Arts; A.A. Integrated Studies

CERTIFICATIONS

Anthropic — AI Fluency: Framework & Foundations

SKILLS

Programming & Query: SQL (PostgreSQL), Python, R, Java, MATLAB

Data Analysis & Visualization: Power BI, Excel (advanced), Quarto, LaTeX

Statistical Methods: Regression, hypothesis testing, A/B testing, predictive modeling, precision/recall, evaluation metrics

Analytical Approach: Data profiling, root cause analysis, lift analysis, backtesting, gap analysis

Strengths: Stakeholder communication, cross-functional collaboration, AI-assisted analysis, comfort with ambiguity
